

Enterprise NeuroSystems Group

—

Meeting: Jan 31, 2022

Topics & Group Responses (*italics*)

What enterprise neurosystem group procedures should we follow before the group of volunteers start their coding activity?

- **Group Answer:** *Nothing needed at current time -- Start coding the first MVP component*
- *Post coding, at suitable time, there will be a review by Software Evaluation Committee*

Explore possible collaboration and volunteers from other companies participating in the group

- *Tong Zhang from Intel will volunteer time and some assets*

Resources available for group members to use

- *Audrey to explore resource availability and report back*
- *Bill will explore Open MaaS Cloud*

How do we balance software development centric discussions in the group with ideas for other central intelligence capabilities development

- **Group Answer:** *Focus on the development of the first MVP component – and we can revisit things if we fail (then fail fast)*
